## 3. Description of incident (customer's words)

We came downstairs at about 7:40am and found water spraying from under the kitchen sink. The braided flexi hose connecting the cold tap had split. I turned off the water at the mains straight away and called an emergency plumber, who replaced the hose that morning. Water had spread across the kitchen and into the dining area. The bottom of the kitchen cabinets has swollen and the timber floorboards are cupping. We used towels and hired fans to dry the area. The house is liveable and nobody was hurt. The burst hose has been kept as asked.
